

Corporate Affairs System

CAS is the world's leading solution for managing your company secretarial needs. CAS lets you take control of corporate compliance and converts your compliance costs into profits.

From its humble beginnings in 1987, the Corporate Affairs System (CAS) has grown to be the most widely used and comprehensive corporate secretarial management solution in the world today.

The reasons for this are very simple:

- CAS is a clever, fast, intuitive and very easy to use task orientated software package. When you use CAS you will quickly forget the days of manually preparing documents for ACRA.
- CAS automatically creates and prefills electronic filing summaries or forms and supporting documentation to ensure you comply with all requirements of the Companies Act. By making a simple change to a corporate register, CAS will automatically prepare all the documents required.
- CAS has also been verified by ACRA for the production of XBRL Financial Statements. The CAS XBRL process makes it simple to input the data required to complete XBRL Financial Statements on your own computer and then lodge the XBRL data with ACRA. The CAS process is 50% faster than using ACRA's FS Manager.
- CAS prepares documents for all the common changes made by Singapore Companies. The paper Form 45 - Consent to Act as Director, Form 45B - Consent to Act as Secretary and a Singapore Share Transfer Form are also prepared. For a full list of forms prepared by CAS check out www.bglcorp.com.au.
- CAS includes a very comprehensive screen based help system. CAS help and online training manuals are designed to guide you step by step through the data input and document preparation processes, ensuring you will always comply with the requirements of the Corporations Act.
- CAS gives you the power and functionality to prepare in excess of 600 company and business name forms with supporting documentation that **guarantees compliance** for 25 corporate jurisdictions including Australia, BVI, Cayman Islands, Fiji, Hong Kong, Malaysia, New Zealand, Singapore and the United Kingdom.
- CAS allows documents to be automatically exported to Adobe PDF, MS Word or MS Excel. CAS intelligently saves documents for easy retrieval and even automates the process of emailing documents to your business associates. Any CAS document can be easily changed to meet your individual needs.
- CAS automatically tracks all documents as and when they are prepared. This tracking means documents can be easily searched and retrieval at the click of a button. And the CAS Task Management system gives you full control over documents from preparation to lodgement and beyond.
- CAS includes hundreds of standard management reports and listings. CAS also integrates with BGL Query, a sophisticated software solution that enables you to create user defined reports.
- CAS includes **BGL Corporate Tree** – an easy to use graphical tool that automatically generates corporate trees from your CAS database in seconds.
- CASNet is the browser interface for CAS that allows your team to prepare reports and notify changes to corporate registers 24 hours a day, 7 days a week, via the Internet or over your corporate intranet. CASNet also allows clients to view their corporate registers providing real time client collaboration.
- The CAS Product Range includes three scalable corporate secretarial solutions – CAS, CASLite Plus and CASLite. By providing you with choice, BGL can ensure you have the right solution to meet your business needs.

If you would like to learn more about CAS, contact the BGL Sales and Marketing Team by email at info@bglcorp.com or call us on toll free telephone 800 616 2148.
